

# Jean Gottmann as Guest-Editor of *Ekistics*

**EKISTICS/OIKISTIKH: the problems and science of HUMAN SETTLEMENTS**  
Volume 46, number 274, January/February 1979

**Offices and urban growth**

- 2 The anthropocosmos model
- 3 The editor's page
- 4 Office work and the evolution of cities *Jean Gottmann*  
Increasing abstract transactions, decision making and information processing affect deep changes in urban social structures.
- 7 The changing transactions economy and its spatial implications *Robert Cohen*  
The processes recasting the functions and performed in the business centers of major American cities.
- 15 Edinburgh — concentration and dispersal *J. Wreford Watson*  
The dynamics of Edinburgh lead to a predominance of cultural and government functions in its center.
- 25 Office activity in Edinburgh *John Fernie*  
A description of office locations and office linkages in and around Edinburgh.
- 33 The recent evolution of Oxford *Jean Gottmann*  
The university of Oxford as a generator of quaternary activities.
- 36 The web of economic activities in Oxford *Barbara Baird*  
Responses to a questionnaire show the variations of dependence and independence from London of Oxford's quaternary activities.
- 44 External relations of Oxford: university linkages *Susanne R. Walker*  
A study of the geographical spread of Oxford students and professors, mapping "the territory of the intellect."
- 53 Internal linkages in the upper tertiary sector of Nantes *A. Mesnard and A. Vigarité*  
An investigation into the dependence on Paris of the quaternary activities of Nantes.
- 68 Ekistic grid index

This issue was compiled by Jean Gottmann, guest editor.

Cover: Suburban office locations in Edinburgh (from the article "Office activity in Edinburgh," by John Fernie, p 25 of this issue).

**EKISTICS/OIKISTIKH: the science and study of HUMAN SETTLEMENTS**  
Volume 50, Number 299, March/April 1983

**Capital cities**

- 86 The anthropocosmos model
- 87 The editor's page
- 88 Capital cities *Jean Gottmann*  
A good hosting environment is a requisite for a good capital city but it is debatable whether it is more efficient for the capital to be independent of or part of a bustling metropolis.
- 93 Oslo: Capital city in the Norwegian system *Sten Sparre Nilsson*  
The strength of peripheral influences over domination of the country by the capital city.
- 98 Warsaw: Capital city in its national system *Ludwik Straszewicz*  
Although Warsaw is the political and the geographical center of Poland, the national policy is to strengthen the population and the cultural and industrial importance of the regional centers.
- 103 Rome: Capital city in Italy *Calogero Muscarà*  
The growth of Rome from a relatively isolated nonindustrial city to the major communication center and unifier of modern Italy.
- 110 Tokyo: Metamorphosis of the capital and evolution of the urban system in Japan *Yasuo Miyakawa*  
The visible and invisible linkages between central government, local government, academic and business interests, as exemplified in an analysis of the capital.
- 123 Washington: A small, cozy town, global in scope *Aian J. Hennikson*  
The ways in which the government in Washington — a relatively small, peripheral and almost exclusively political capital — mirrors and interprets rather than initiates or molds public opinion.
- 151 Ekistic grid index

This issue was compiled by Jaqueline Tyrwhitt, Consultant Editor, and Jean Gottmann, Guest Editor.

Cover: Our global world (from N.L. Engelhardt, Jr. *Toward New Frontiers of our Global World*, New York, Noble and Noble, Publishers, Inc., 1943, p. 28) slightly modified by EKISTICS.

Covers and tables of contents of *Ekistics* (vol. 46, no. 274, January/February 1979) on Offices and Urban Growth, and *Ekistics* (vol. 50, no. 299, March/April 1983) on Capital Cities with Jean Gottmann as Guest-Editor.
