

The anthropocosmos model

Adapted version of model for EKISTICS

Usually the Anthropocosmos Model reflects the contents of the issue to which it belongs. This time, however, it reflects two issues (vol. 69, no. 412/413/414, January/February-March/April-May/June 2002 and vol. 69, no. 415/416/417, July/August-September/October-November/December 2002) which are devoted to papers presented and other material used from the 2001 programs of the WSE – more specifically the 2001 C.A. Doxiadis Lecture and the Symposium on "Defining Success of the City in the 21st Century".
